17. Project title: Not applicable for Iraq/MENA S&	Tapplicants.		_
Economic Experiments for the analysis of the		ental regulation	
18. Brief summary of project statement: <i>Not applicable for Iraq/MENA S&T applicants</i> .			
In this project we will design and conduct en with respect the compliance behavior of pol	conomic experiments to test hypotheses luting firms under different policy	_	
instruments and enforcement designs. In particular, we will test the effect of			

In this project we will design and conduct economic experiments to test hypotheses with respect the compliance behavior of polluting firms under different policy instruments and enforcement designs. In particular, we will test the effect of different fine structures on the ability of the regulator to induce perfect compliance under two regulatory systems: emission standards and tradable pollution permits. This is important because, according to the economic theory, which of these two instruments should be used to control emissions of a pollutant at the least social cost depends in part on the fine structure and enforcement costs. Our project
